Thomas Friedan, MD, MPH
Director
Centers for Disease Control and Prevention
1600 Clifton Road
Atlanta, GA 30333

Subject: CDC Lead Poisoning Prevention Program

Dear Dr. Friedan:

Enclosed is a Declaration that was recently adopted at the national conference of the Lead and Environmental Hazards Association urging a restoration of the CDC's lead poisoning prevention program. We hope that you will take action to enable this program to carry out its important mission.

Sincerely,

IS/ Stephen Weil

Stephen Weil
Executive Director

2012 DECLARATION OF NATIONAL LEAD POISONING PREVENTION DELEGATES

We are hundreds of delegates to the Lead and Environmental Hazards Association and the National Association of Lead and Healthy Homes Grantees representing thousands from all walks of life to assess the state of the nation's childhood lead poisoning prevention campaign. We are doctors, nurses, advocates, scientists, parents, business executives, local and state government officials, environmental professionals, inspectors, risk assessors, abatement contractors, artists and teachers, as well as citizens, taxpayers and concerned parents.

We find that the nation failed to meet the 2010 goal to eliminate childhood lead poisoning,¹ and that the disease is entirely preventable.

We find that unless we take action, millions of children will be poisoned in the coming years and that at least half a million children have excessive exposures above 5 µg/dL today², which causes long term adverse health effects.³

We find that the Centers for Disease Control and Prevention (CDC) should adopt the recommendation of its Advisory Committee on Childhood Lead Poisoning Prevention.⁴

We find that hundreds of local lead poisoning prevention activities across the nation will be forced to close this summer due to loss of CDC funding.⁵

We find that for every \$1 dollar invested in lead poisoning prevention, the nation gains up to \$221⁶, that the CDC program has a proven track record and works by enabling parents to find help for their children and by conducting many other core functions essential to the health of the nation and the world. It costs at least \$38,000 over 3 years to provide special education to a lead poisoned child,⁷ but it makes no sense to pay this cost when we could prevent it.

THEREFORE, Congress must restore the CDC program to its previous level of at least \$29 million as a separate protected line item and restore its staff capacity.

THEREFORE, the Administration must immediately provide discretionary funding to enable local lead poisoning prevention programs across the country to continue their work this year, not shut down.

THEREFORE, the Secretary of Health and Human Services and the Administrator of the U.S. Environmental Protection Agency, as co-chairs, should convene an emergency cabinet-level meeting of the President's Task Force on Environmental Health and Safety Risks to Children to find a way to prevent the shutdown of local programs this summer.

THEREFORE, we demand that the nation's budget not be balanced on the backs of our most vulnerable children. We demand that our children be protected and that our country's resources be properly allocated to restore the nation's capacity to prevent childhood lead poisoning.

⁵ The President's budget for 2012 proposed to cut in half the lead poisoning prevention program at CDC. Congress in the final budget appropriation reduced the CDC lead poisoning prevention program from \$30 million to only \$2 million
